

LET'S TALK

VEHICLE ELECTRIFICATION *And* ALTERNATIVE FUELS

ELECTRIC CARS AND ALTERNATIVE FUELS CAN IMPROVE OUR ENVIRONMENT

AND SLOW CLIMATE CHANGE BY REDUCING POLLUTION AND EMISSIONS.

THESE TECHNOLOGIES ARE GETTING BETTER ALL THE TIME,

THEY ARE AN IMPORTANT STEP TOWARDS BUILDING A ZERO EMISSIONS LIFE.

WHILE MOST VEHICLES TODAY ARE GAS FUELED,

HYBRID OR FULLY ELECTRIC VEHICLES, ETHANOL, BIODIESEL AND OTHER LESS COMMON FUELS ARE STARTING TO CHANGE THE MARKET.

NOT TO MENTION, ELECTRIC VEHICLES ARE STILL PRETTY EXPENSIVE TO BUY.

BUT, THEY'RE GETTING MORE AFFORDABLE AND GENERALLY COST LESS OVER TIME.

MINNESOTA IS INCREASINGLY SUPPORTING THE USE OF ELECTRIC VEHICLES BY HELPING TO INSTALL MORE CHARGING STATIONS WHERE YOU NEED THEM!

WHAT WOULD INSPIRE YOU TO GET AN EV?
